

# Creating a Sitemap

What is a sitemap?

How to create a sitemap?

Example sitemap

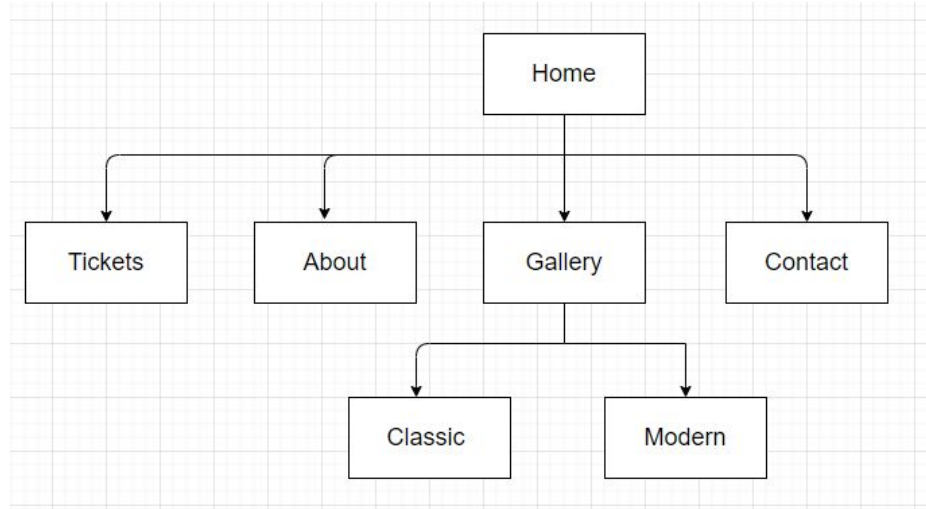

**What is a sitemap?**

# What is a sitemap?

It is the list of pages of a website.

It is a graphical representation of the structure or the hierarchy of a website

**How to create a sitemap?**

# How to create a sitemap?

It is part of the design process that needs to begin before coding.

Start creating a list with the content you want to provide to your website.

Home page will be the root, its child pages will be the main navigation topics which can be accessed from the main page.

Expand child pages with second and third level child pages.
