Design Process and decisions

1. Design Sitemap of what I want to include in my portfolio
2. Create a wireframe/mockup of what i intend my website to look like.
3. Start coding HTML and CSS.
4. Dive into a rabbit hole, move sitemap and wireframes to bin because ideas keep changing as HTML and CSS is coded.
5. Repeat Steps 1 and 2.
6. Continue coding, inevitably wanting to test more new ideas because its your first time coding and not finish off my current code.
7. Leave the code alone because I had no more time to add new/change features.

Aesthetic Features

- Minimalistic approach
- Wanted to include more images since pictures paint a thousand words
- White and green are my new favourite colour
- Main media breakpoints selected were 600px for mobile and 768 for tablets and 992px for desktop
- Included contact links + copyright comment at footer of all pages

Index/ Home Page - Mobile

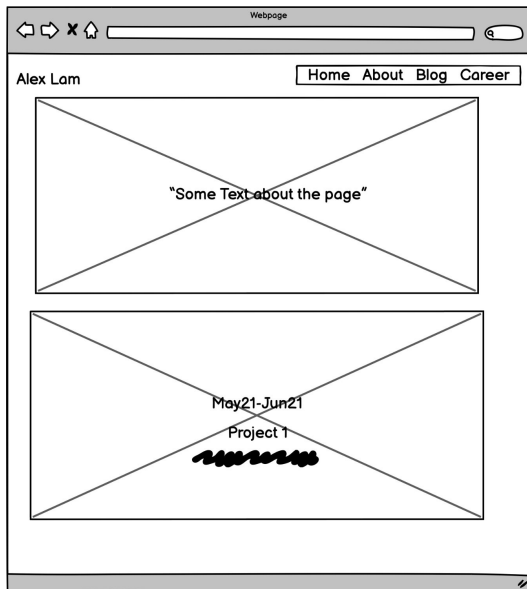

Styling

- Centered with little to no padding to edge of device
- Images to help aid aesthetic of webpage

Components

- Navbar (Header and Footer)
 - These are aided with flexbox
flex-direction set to "column"
- Project Links
- Contact Links

Index/Home page - Tablet

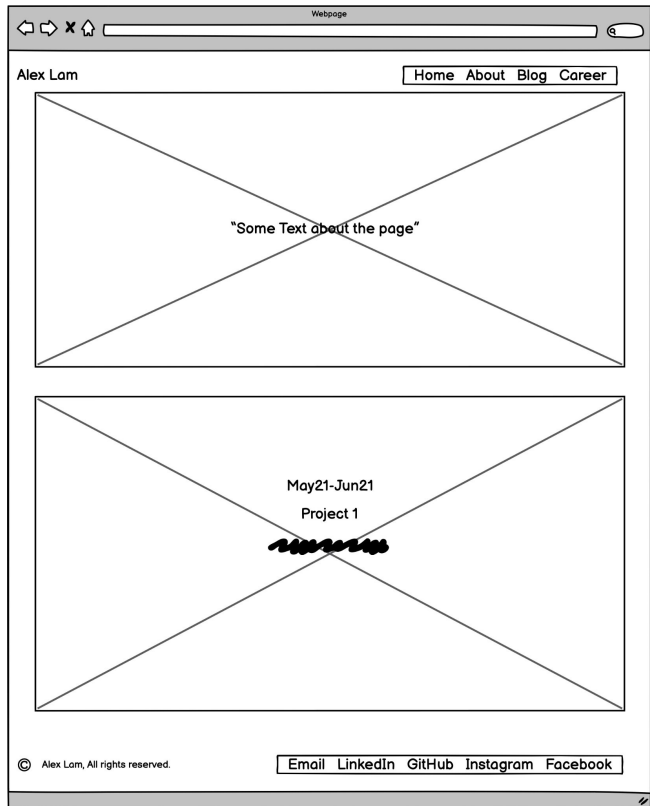

Styling

- Very similar to desktop view
- Images maximised to width of viewing device

Components

- Navigation
- TextBox at the center of background image

Index/Home page - Desktop

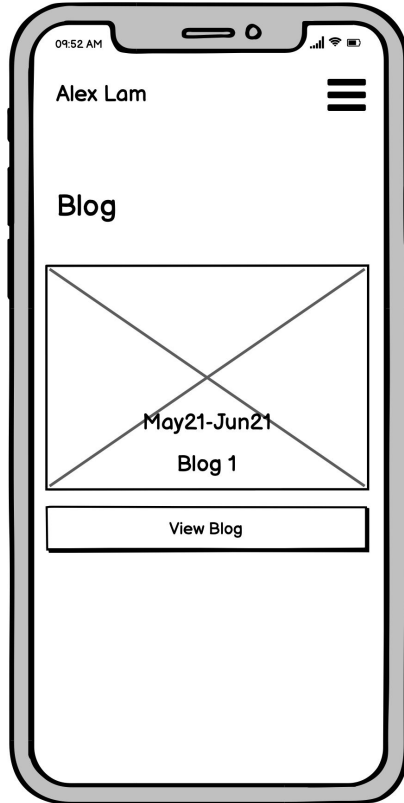

Styling

- Background Images set to 50% of viewport height to make up pages
- All contents aligned to centre

Components

- Text box set to centre of image
- Navbar organised with flex-box row

Blog main page - Mobile

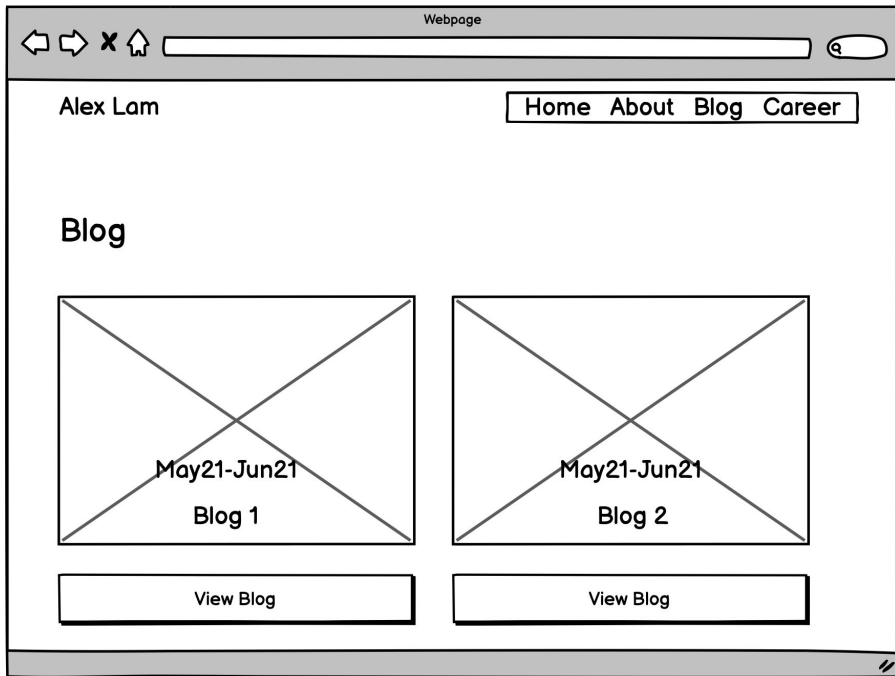

Styling

- Similar to main/index page; images dominate the screen
- Use of 'view blog' button

Components

- Navigation
- Blog cards (picture, title, date)
- Footer

Blog main page - Tablet

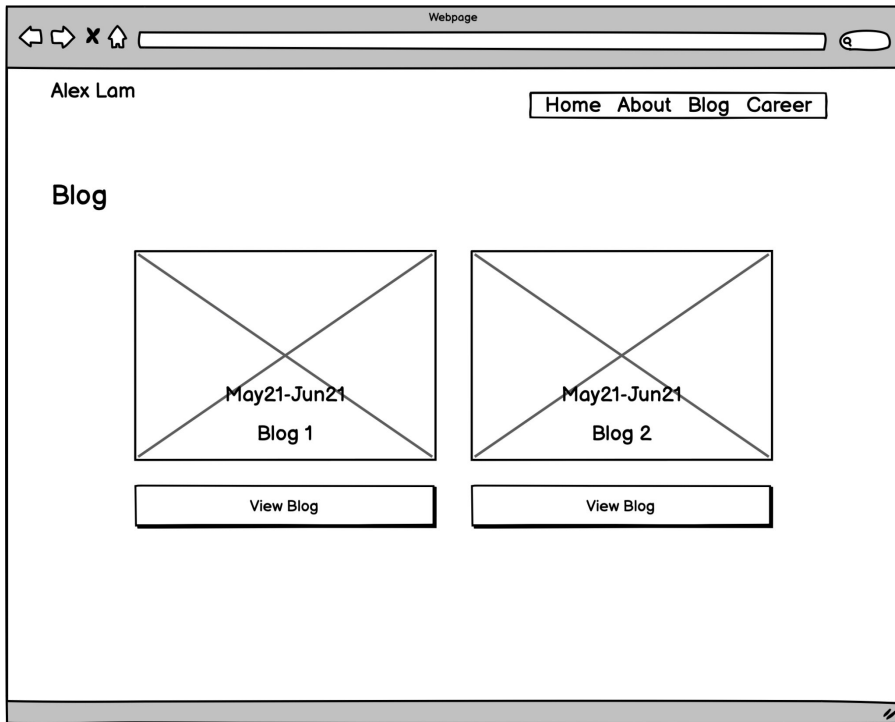

Styling

- Body is broken up to Columns and rows. Rows are organised with flex to create blog cards
- Added padding to provide space between

Components

- Navigation
- Blog cards (picture, title, date)
- Footer

Blog main page - Desktop

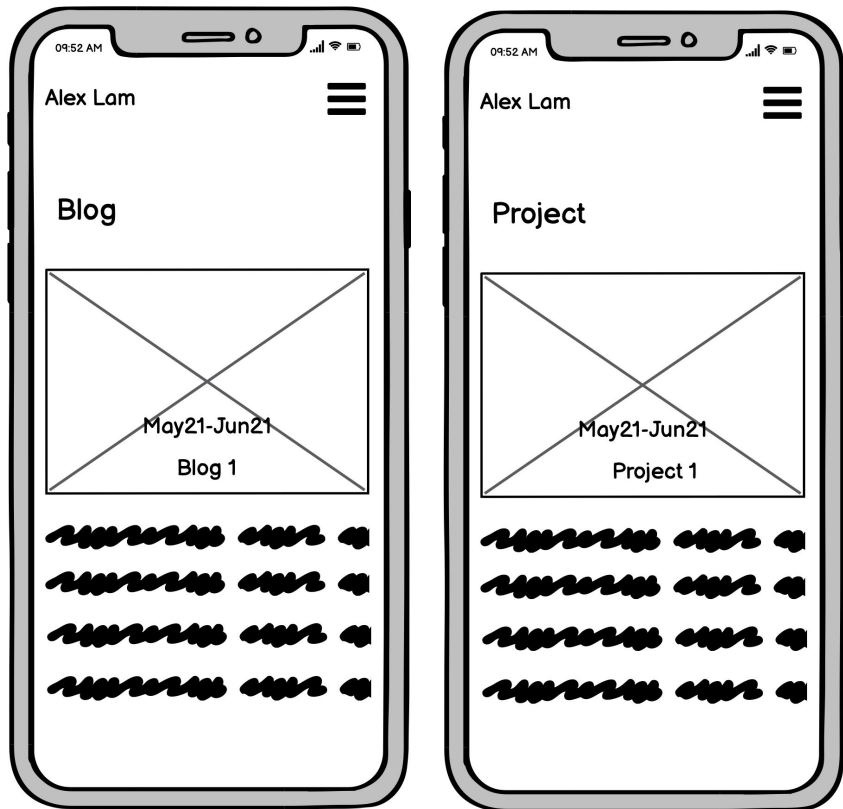

Styling

- Body is broken up to Columns and rows. Rows are organised with flex to create blog cards
- Added more padding to provide space between

Components

- Navigation
- Blog cards (picture, title, date)
- Footer

Project/Blog page - Mobile

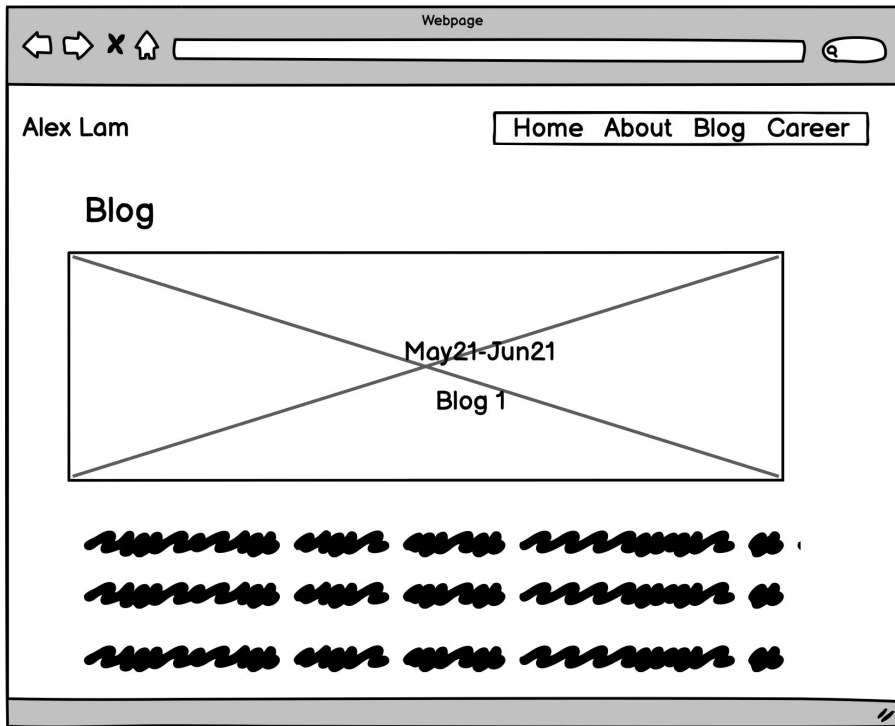

Styling

- Image max width
- Textbox on top of background cover image
- Text beneath image

Components

- Navigation
- Title
- Footer

Project/Blog Page - Tablet

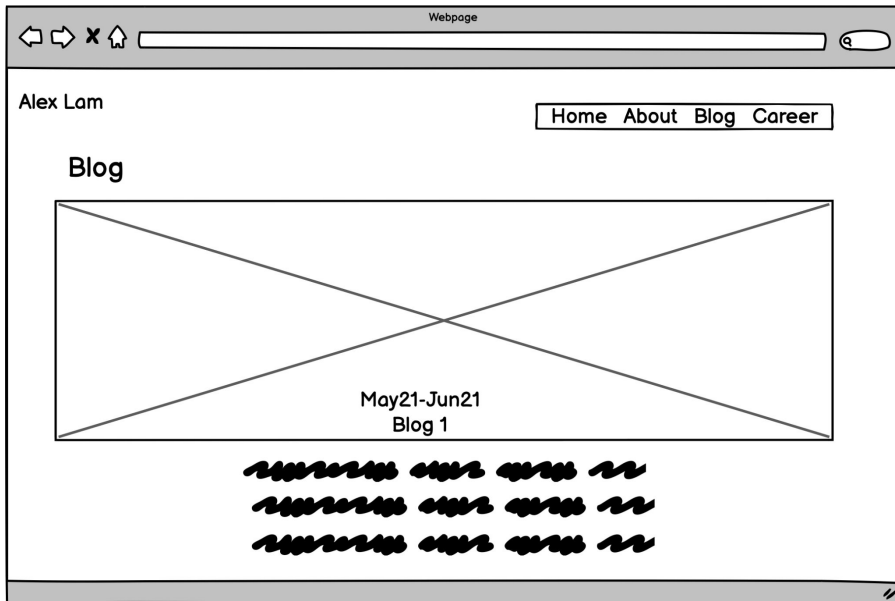

Styling

- CSS layout essentially maintained in both project and blog pages.
- Images stretched to maximum width
- Text box also has similar width

Components

- Navigation
- Background-Image: cover;
- Text
- Footer

Project/Blog page - Desktop

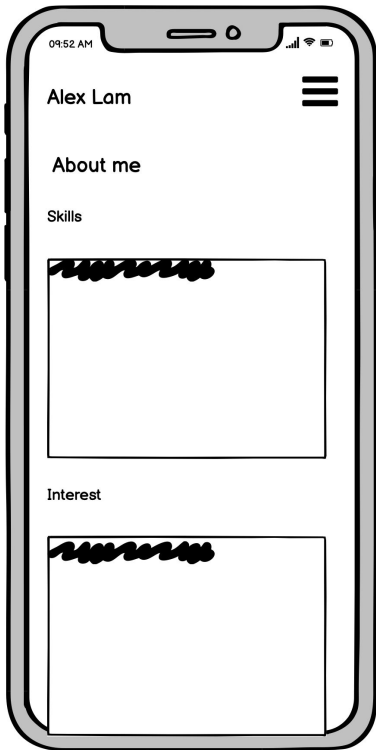

Styling

- CSS layout essentially maintained in both project and blog pages.
- Images stretched to maximum width
- Text box contents centered from top to bottom of page (max-width set to ~50%)

Components

- Navigation
- Background-Image: cover;
- Text
- Footer

About page - Mobile

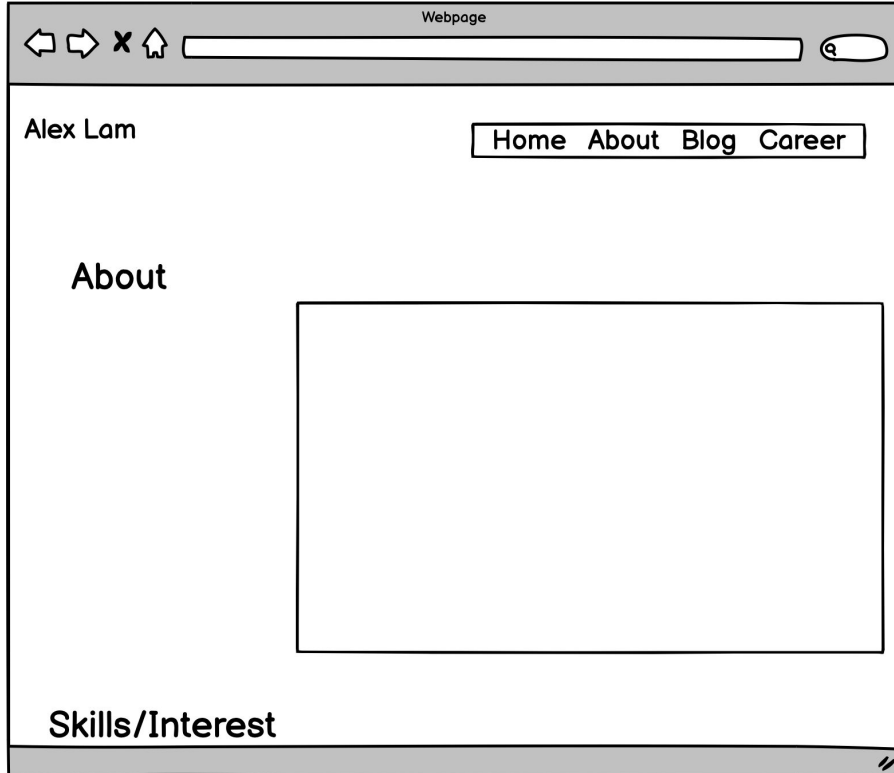

Styling

- Different media breakpoint for mobile (max-width: 600px), tablet (max-width 768px).
- All contents centered and go from top to bottom of page

Components

- Header (top left)
- Navbar (top right)
- Contents (main)
- Footer + Copyright

About Page - Tablet

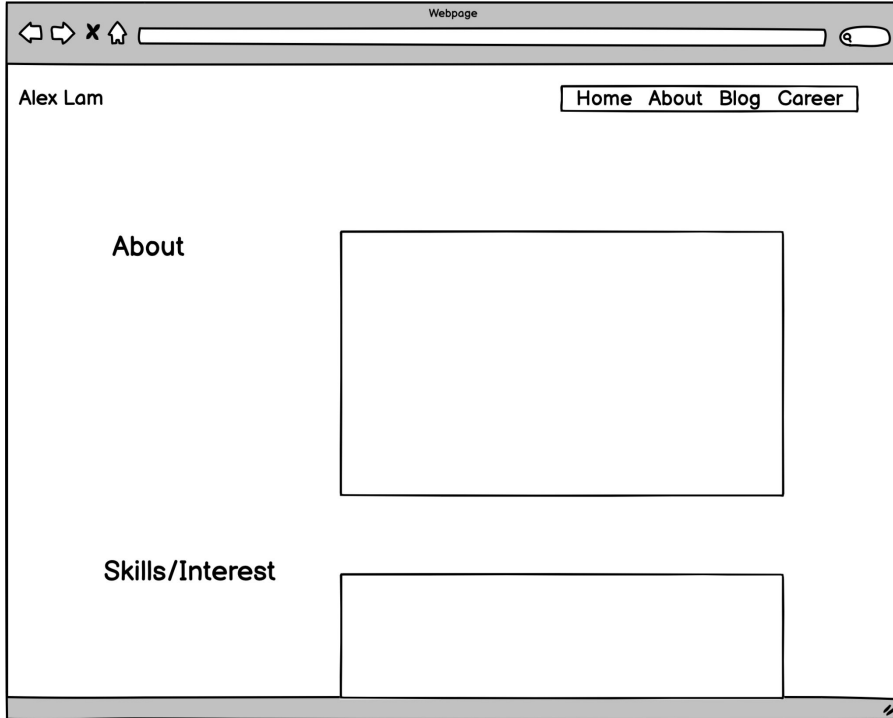

Styling

- Created using rows and columns (2 grid layout) with Flex Box to assist with row arrangements
- Main Left Header column vs right Content column.

Components

- Navigation
- Header column
- Content Column

About Page - Desktop

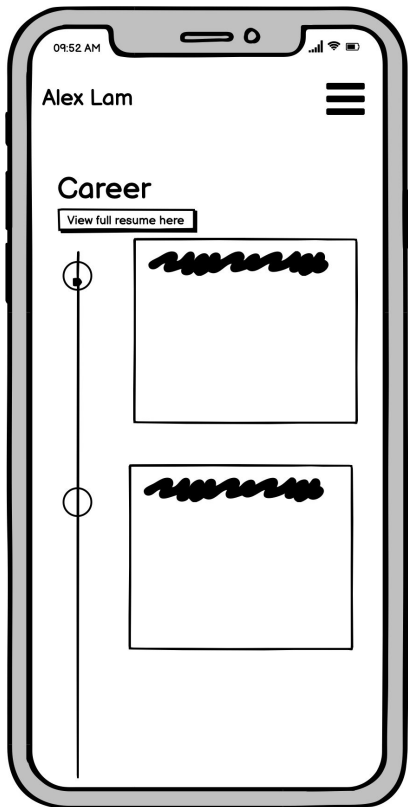

Styling (similar to tablet)

- Created using rows and columns (2 grid layout) with Flex Box to assist with row arrangements
- Main Left Header column vs right Content column.

Components

- Navigation
- Header column
- Content Column

Career/Education - Mobile

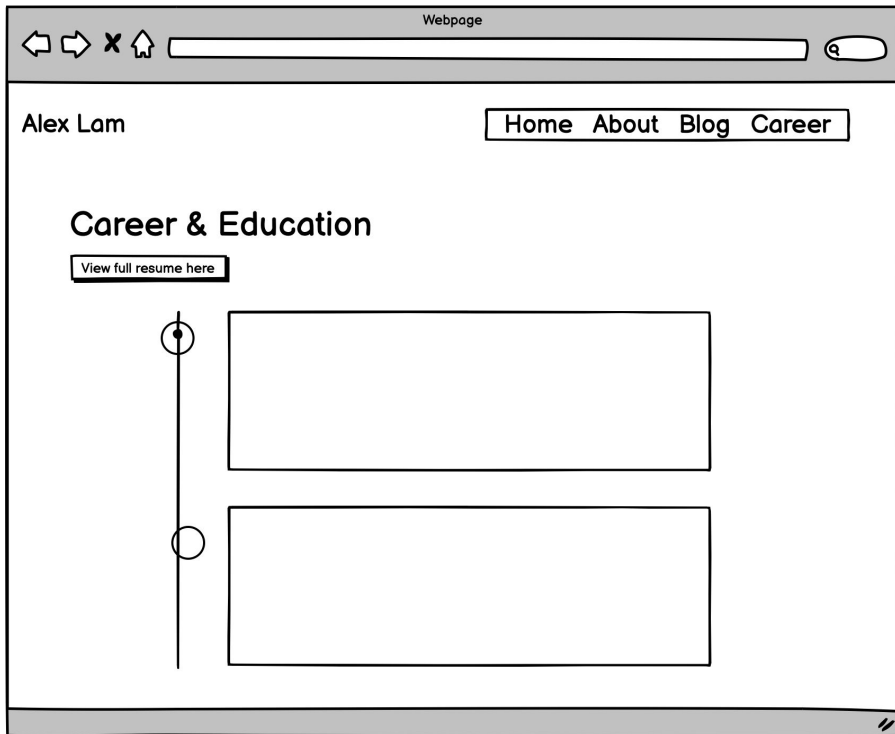

Styling

- Main events in containers floating slightly to left
- Timeline feature and shapes used to style and indicate position
- Different media breakpoint for mobile (max-width: 600px), tablet (max-width 768px).

Component

- Navigation
- Title and button for Resume (PDF)
- Tiles of each major career/education event.

Career/Education - Tablet

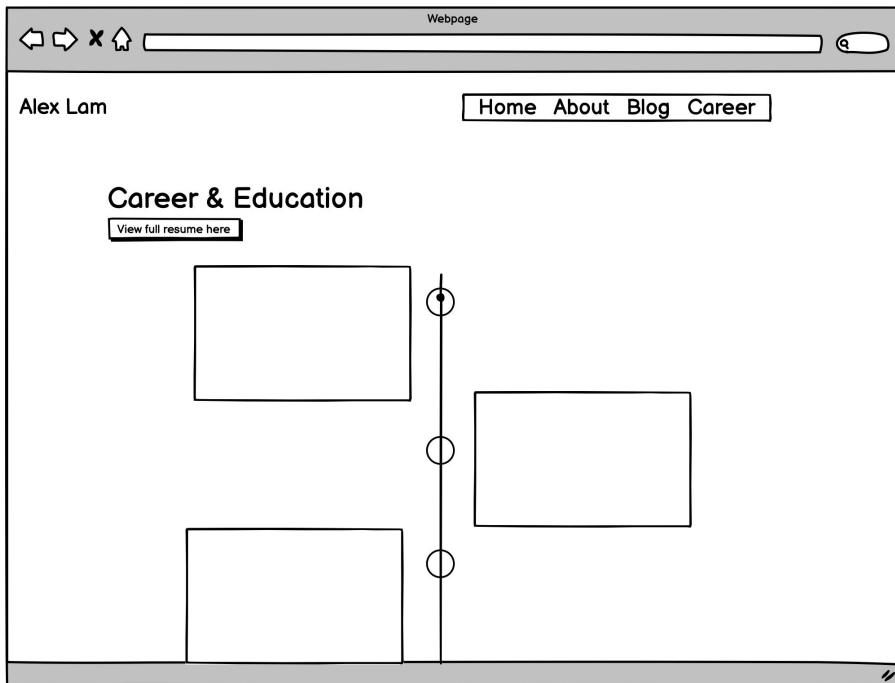

Styling

- Main events in containers centered with timeline on the left
- Timeline feature and shapes used to style and indicate position
- Different media breakpoint for mobile (max-width: 600px), tablet (max-width 768px).

Component

- Navigation
- Title and button for Resume (PDF)
- Tiles of each major career/education event.

Career/Education - Desktop

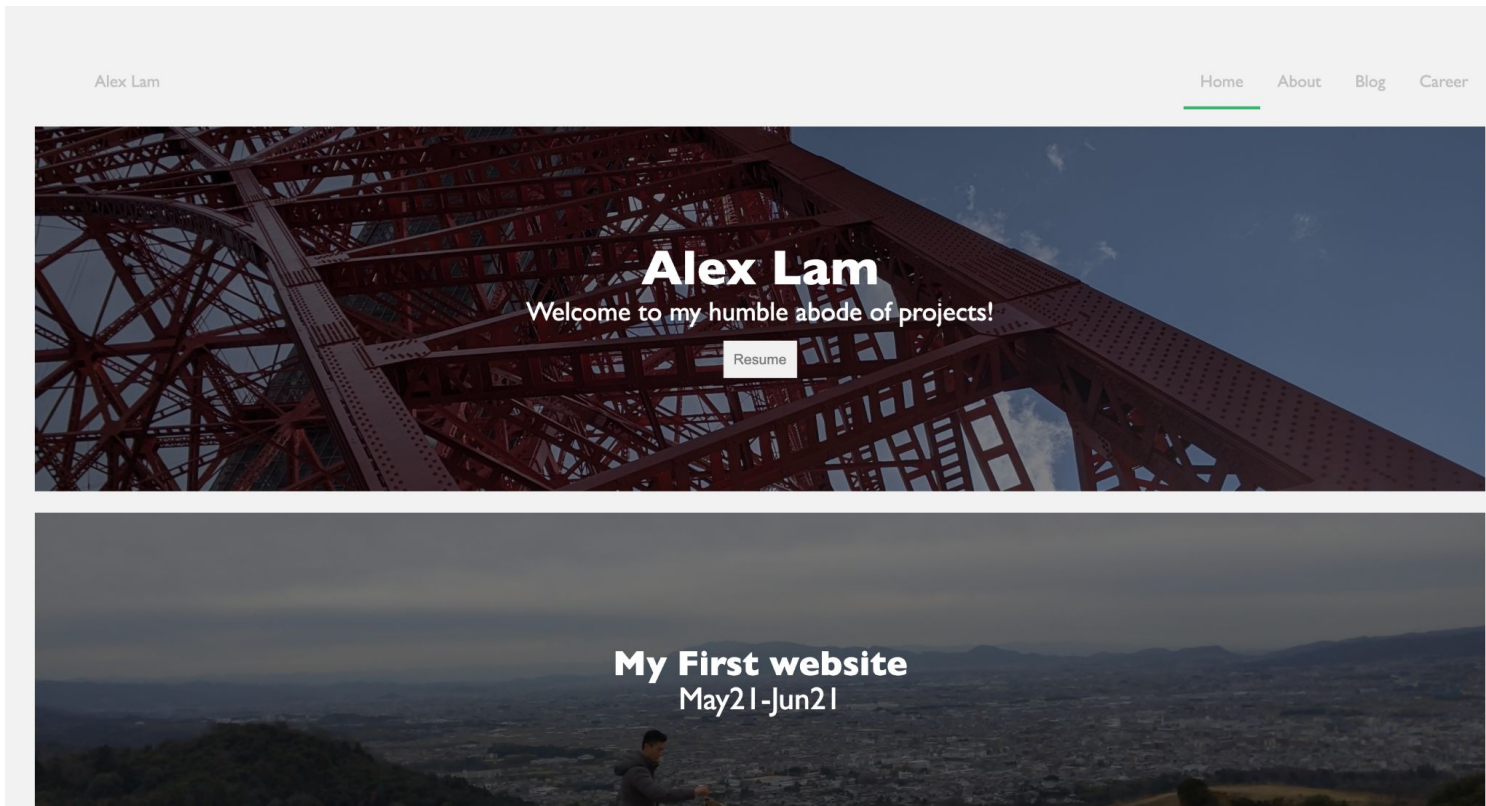

Styling

- Each tile event alternate between sides
- Centered Timeline Lines

Component

- Navigation
- Centered timeline with shapes
- Tiled events of each significant event in career/education.
- Footer

Some actual pages

About

Brief Intro

I am a **professional pharmacist-turned software developer**, focusing on virtually anything with **code, cloud and cyber**. I am currently building and learning in all three fields, working as a part-time pharmacist.
